

Xaton

Xaton is a bold geometric display typeface built from sharp, interlocking forms. Diagonal cuts, flat terminals, and split counters give every letter a constructed, architectural presence, combining angular strokes, tight apertures, and confident structural weight to create a striking visual identity.

Built with a single heavy weight, dense proportions, and stencil-inspired construction, Xaton delivers strong on-page impact that feels both modern and industrial. The design embraces bold geometry rather than ornamentation, relying on the interlocking rhythm of its letterforms and sharp structural cuts to establish a distinctive typographic texture.

Xaton includes an extensive multilingual character set covering Western and Central European languages, alongside a full range of figures, punctuation, and symbols. Refined OpenType features such as fractions, ordinals, superscripts, and stylistic alternates offer greater flexibility for headlines, branding, and large-scale display applications.

Xaton

Carefully
Crafted

Xaton is a bold geometric display typeface that blends architectural structure with sharp angular detail. Designed with a single heavy weight and confident stroke contrast, it offers a striking visual rhythm that feels both modern and industrial.

At its core, Xaton is a ligature-focused typeface, where letter interactions are carefully designed to enhance continuity and visual flow. The letterforms are shaped to maintain clarity while introducing distinctive character through diagonal cuts, flat terminals, and thoughtfully constructed ligature connections. These features create a more cohesive and dynamic reading experience without compromising structural balance.

The typeface includes a focused set of OpenType features — ligatures (ff, fi, fl, ffi, ffl), fractions, ordinals, superscripts, and stylistic alternates — providing controlled refinement and flexibility across compositions. The ligature system functions as an integral part of the design, allowing words to lock together more naturally and expressively.
